Preparing for a Business Link software installation

Before the Business Link software can be installed and configured, you must ensure that your site meets the requirements. This includes obtaining licenses and gathering information. Full installations of Business Link are performed by Kodak. You can download and install updates as they become available.

- Preinstallation information to collect
- Installation requirements
- Installing Business Link for the first time
- Software updates and upgrades
- Opening the Administration Client
- License management
- Troubleshooting the installation
