No Curves Playing Card Box

What we know about this job :

-This file consists of simple vector objects and normal translucent inks.
-You will need to define the Dieline color as a Dieline colorant in per-job color editor.
-Black car intersects with two different colors, therefore the black should knock out and trap, but the type
 on the sides and top of the box should overprint.
- The dieline should be handled normally.

Process Blue
