

KODAK PANDORA Step-and-Repeat Software

Welcome to the user documentation for version 7.5 of KODAK PANDORA Step-and-Repeat Software.

If you have any questions about or suggestions for these documents, please use the **Provide Feedback** link at the bottom of the page.

To find more documentation about Pandora software—for example, troubleshooting items—please go to the [Partner Place](#) service and support portal.

What is Pandora software?

The Kodak Pandora software is a packaging and label layout application that you use to import, align, and step-and-repeat artwork and marks quickly and easily, to create a job file ready for printing. Pandora software uses PDF (Adobe Portable Document Format), PJTF (Adobe Portable Job Ticket Format), Oracle Java, XML (Extensible Markup Language), CIP3 PPF (Print Production Format), and JDF (Job Definition Format) technologies.

Pandora 7.5 is compatible with the [Kodak Packaging Layout Automation \(PLA\) 7.5](#) software (for Prinergy Workflow 7.0.1 or later).

Note: Pandora 7.5 was originally planned as version 4.5, but was adjusted to match the numbering that is now common across Kodak workflow products. There are no Pandora versions between 4.0.4 and 7.5.
