

Activity 6: Add a Harmony spot ink curve to a print transfer curve

Background

You can add spot curves imported from Harmony to a print transfer curve .

Note: You can only add a Harmony spot curve to a transfer curve imported from Harmony, not a transfer curve you created in ColorFlow.

Error rendering macro 'excerpt-include'

No link could be created for 'Activity 1: Import and use a Harmony curve in Prinergy'.

Tasks

Task 1: Add a Harmony spot ink curve to a print transfer curve

1. In ColorFlow software, click the **Print Curves** tab.
2. In the **Harmony Curves** section, select the Harmony spot curve **PRINT SPOT Curve Pantone 123** and drag the curve to curve **XX Transfer Curve Activity 05** in the **Transfer Curves** section.
3. In the **Transfer Curves** section, click curve **XX Transfer Curve Activity 05** to the transfer curve object in the Viewer window.
4. Click the **Properties** icon . You should see the spot ink in the **Spot Inks** section.

Outcome

You have added a spot ink to the transfer curve you imported from Harmony.
