There are no new features or enhancements in this version of the software.

Problems fixed

Ticket Number	Description
CLRFLW-8006	Plate Curve "Date Modified" changes to current date/time after restart ColorFlow client
CLRFLW-7992	Client installer uses Server Derby port for color store migration
CLRFLW-7990	Cannot capture snapshot with ColorFlow PC client and customer Colorstore
CLRFLW-7987	i1iO custom chart default size wrong
CLRFLW-7986	i1iSis custom chart default size wrong
CLRFLW-7983	Server shows new snapshot before its Capture is complete
CLRFLW-7982	Cannot rename ColorFlow folder on Mac or ColorFlow will not launch
CLRFLW-7981	ColorFlow 8.0.2 and 8.1.1 create empty colorstore wrapper folders on MacOS in User directory
CLRFLW-7979	Plate Curve "Date Modified" changes to current date/time after viewing curve and not making any changes

Known issues

CLRFLW-8028: ColorFlow client installation may fail on Prinerger server

Workaround: If this happens, delete all files in C:\temp\.
