

Failure to Create Job—A Required Field is Missing

Because Category is a required field, and because the Category attribute is missing entirely in this example, Business Link ignores the message.

```
<?xml version="1.0" encoding="UTF-8" ?>
<jdf:JDF ID="NodeID8" Type="ProcessGroup" JobPartID="Body"
  DescriptiveName="Priority Jobname" Status="Ready" JobID="1234" SettingsPolicy="BestEffort"
  Version="1.2" xmlns:jdf="http://www.GIP4.org/JDFSchema_1_1"
  xmlns:jdfTyp="http://www.GIP4.org/JDFSchema_1_1_Types"
  xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">
  <jdf:CustomerInfo CustomerID="0001" CustomerJobName="MIS Job Name">
    <jdf:Contact ID="NodeIDB2" Status="Available" Class="Parameter" ContactTypes="Customer">
      <jdf:Company ID="C12" Status="Available" Class="Parameter" OrganizationName="ABC
        Advertising Ltd." />
    </jdf:Contact>
  </jdf:CustomerInfo>
</jdf:JDF>
```

ERROR [CMIS_HotFolderMISServer] code 125415; The file
E:\Link_HF\Inbox\BasicCreateJob.xml does not contain a valid create job
message.
