

Hardware and software requirements

Supported Kodak workflow software

InSite Creative Workflow 7.5 supports the following versions of Kodak software:

- InSite Prepress Portal 7.0.2 or 8.0.1
- Prinergy Workflow system 7.0 or later
- Matchprint Virtual 7.0.x

InSite Creative Workflow servers and workstations must meet specific hardware and software requirements, depending on the operating system used.

Supported servers

InSite Creative Workflow and Distribution can run on the following platforms:

Windows 2008 R2:

- Dell PowerEdge T620, T630, R720, R730
- Kodak Virtual Operating Environment (KVOE) using VMWare ESXi 5.0 or later

Note: A minimum of 8 GB of RAM is highly recommended for Microsoft Windows Server 2008 R2.

Supported client computers

If you use the Kodak Matchprint Virtual technology with your InSite Creative Workflow system, you and your clients must use qualified and calibrated Mac computers for viewing the color of files and surfaces accurately. For the system requirements of a Matchprint Virtual configuration, see the Matchprint Virtual Release Notes, which are available on Partner Place at <https://partnerplace.kodak.com/>.

Supported operating systems

InSite Creative Workflow supports macOS 10.13 (High Sierra), macOS 10.12 (Sierra), Mac OS X 10.11 (El Capitan), Mac OS X 10.10 (Yosemite), Mac OS X 10.9 (Mavericks), Mac OS X 10.8 (Mountain Lion), Microsoft Windows 7 (32/64 bit), Windows 8.1 (64 bit) and Windows 10. Mac OS X 10.6.8, Mac OS X 10.7, and Microsoft Windows XP are no longer supported. For more information about supported operating systems, see the InSite Client Configuration document.

Supported browsers

- Microsoft Internet Explorer 11, Edge, Mozilla Firefox, and Google Chrome on Windows
- Apple Safari, Firefox, and Chrome on Mac OS

For complete information about the supported operating systems and browser software versions for client computers, see the InSite Client Configuration document.
