

# Substrate dialog box—Sizes tab

**Important:** Some of the options described in this topic may not be relevant to Workshop in this version of the Prinerger software.

Here you can define the relevant sizes for each specific substrate. The sizes you add here are the sizes that are available in Prinerger the when you select this substrate.

## Add

In the center pane, click to add a new size. The list of available sizes is taken from the sizes defined in **Resources > Size**.

## Delete

In the center pane, click to delete the selected size.
