

Introduction

These release notes describe the changes made in this release of the software. Where applicable, the release notes refer you to additional documents for more information.

Prerequisites

- The Kodak InSite Creative Workflow 7.5 upgrade is available for systems running InSite Creative Workflow 7.0 on Microsoft Windows 2008 R2. If you use earlier versions of InSite Creative Workflow, you must upgrade to version 7.0 before upgrading to version 7.5
- If your system is integrated with the InSite Prepress Portal, the version of the InSite Prepress Portal must be 7.0.2 or 8.0.1.
- If your system is connected to the Kodak Prinergy Workflow system to run the Rule-based Automation, the version of the Prinergy Workflow system must be 7.0 or later.

For more information about InSite Creative Workflow, see the InSite Creative Workflow User Guide.

When you are logged on to InSite Creative Workflow, click Help on the toolbar to display the User Guide.

Licensing

In order to upgrade your InSite Creative Workflow 7.0 system to InSite Creative Workflow 7.5, no specific license key is required.

If you have purchased the Content Check feature, you need to obtain the Content Check feature license key in order to enable the feature.

Obtaining the software upgrade

The files required to upgrade your InSite server to version 7.5 can be downloaded from Partner Place at <https://partnerplace.kodak.com/>. For more information about the upgrade process, see the InSite Creative Workflow Upgrade Guide.
