

Upgrading to Prinerger Cloud 1.4 Releases

Prinerger Cloud Agent 1.4 releases can be installed as an upgrade from Prinerger Cloud 1.2.3 and later without having to uninstall the current version.

To perform the upgrade, follow these steps:

1. Download the latest Prinerger Cloud Agent from Partner Place (for example, PrinergerCloudAgent_1.4.0.39.zip):
https://services.kodak.com/app/answers/detail/a_id/72886/
2. Extract the Prinerger Cloud Agent zip file.
3. Stop Prinerger.
4. Close Prinerger Administrator.
5. Run the Prinerger Cloud Agent installer (eg. CloudAgentInstaller_1.4.0.39.exe). This should automatically update your current Agent without any further prompts.
6. Close the Agent installer and restart Prinerger.

Note: If you are running a version of Prinerger Cloud other than 1.2.3 prior to upgrading to Prinerger Cloud 1.4, you need to coordinate the upgrade of the Prinerger Cloud software from previous versions with your Kodak service representative. The upgrade can be performed remotely at a time that is convenient for you.
