

Recommended client computer hardware configurations

The following tables describe the minimum recommended hardware configurations for computers running a Mac OS or Windows operating system. For information on additional hardware requirements for color-accurate viewing, see the *Matchprint Virtual Release Notes*.

| Recommended Mac Computer Configuration | |
|--|---|
| Display Resolution | 1024 x 768 or higher. If the display resolution is lower than 1024 x 768, you may be unable to see all of the available tools and features. Color-accurate viewing with Matchprint Virtual has additional monitor requirements. For details, see the <i>Matchprint Virtual Monitor Selection Guide</i> . |
| Memory | <ul style="list-style-type: none">• 2 GB of RAM for the PressProof software. If you use multiple monitors with PressProof, 4 GB is recommended.• 1 GB of RAM for all other InSite software |
| Central Processing Unit (CPU) | Apple iMac computer, Apple Mac Pro computer, or Apple Mac mini computer (with an Intel Core Duo or above processors) |

Note: Matchprint Virtual and PressProof are not supported on Apple iMac or MacBook Pro computers.

| Recommended Windows Computer Configuration | |
|--|---|
| Display Resolution | 1024 x 768 or higher. If the display resolution is lower than 1024 x 768, you may be unable to see all of the available tools and features. |
| Memory | 1 GB of RAM If you run other software at the same time, more memory will be needed. |

Note: Matchprint Virtual and PressProof are not supported on Windows computers.
