

Confirming the configuration settings 1

1. Using Windows Explorer, locate where you saved the `InSiteAdmin.htm` file on the network. Open the file.
2. On the Prepress Portal Main (and Standby) Enterprise server, open the InSite Administration software, and click **Configuration**.
3. On the Configuration page, confirm that the settings match the settings in the `InSiteAdmin.htm` file.
4. Confirm that all satellites have been synchronized and the status shows as OK.
