

Exporting process templates

1. In the Process Viewer window, from the **Configure** menu, select **Process Templates**.
2. From the folder tree, select one or more process templates or folders that you want to export.
3. In the Process Template Editor dialog box, from the **File** menu, select **Export Process Templates**.
4. In the Select Export Location dialog box, browse to the mounted volume to which you want to export the process template.
5. Click **Select** to export the process template.
