

Color Pair Rules tab

The list of color pair rules is used to set the priority of the color pair. Use the color rules to set the trap parameters for specific color pairs, and not use the common parameters of all objects. The top of color pair rules inside of the dialog box has the highest priority, the priority order ranges from top to bottom.

New: Use this button to create a new color pair rule.

Modify: Use this button to modify the selected color pair rules.

Remove: Use this button to delete the selected color pair rules.

Move Up: Use this button to raise the priority level of the selected color rule. One click will cause the selected color rule move up one level.

Move Down: Use this button to reduce the priority level of the selected color rule. One click will cause the selected color rule to move down one level.

Creating a new color pair rule

When you click **New**, this dialog box contains the description of the color pairs. The color specified under the **From** heading will expand into the color specified under the **To** heading.

<p>Color Type</p>	<p>Any Color: All colors that are used in the document</p> <p>Process Color: The colors used in the document that are composed with CMYK inks</p> <p>Spot Color: Pantone, DIC, Toyo, and custom spot color in the document</p> <p>Image: Any continuous tone or raster images</p> <p>Gradient: Any objects with gradient effect in the document</p> <p>Empty Background: The empty objects in the document will implement keepaway trapping.</p> <p>Registration Color: Objects composed of all inks used in the job</p> <p>Opaque Ink: The object that contains at least one opaque ink</p>
<p>Ink Name</p> <p>When the selected ink type is spot ink, the ink name option will be available.</p>	<p>This color rule can take effect only on the specified color, not all default colors.</p>
<p>Densities</p> <p>When the selected ink type is process ink or spot ink, the densities option will be available.</p>	<p>Ink at 100%</p> <p>If this option is selected, the current color pair rules can take effect only on an object that has an ink percentage of 100%. If this option is not selected, the current color pair rules will affect objects of any ink percentage.</p> <p>Other Inks at 0%</p> <p>If this option is selected, then the current color pair rules can take effect only on an object without other inks. If this option is not selected, the current color pair rules also can work on an object with other inks.</p>

Trap Action

- **Expert:** Allow the system to decide whether or not to implement trapping.
- **Force:** Force the colors that meet the conditions to implement trapping.
- **No:** Trapping to the colors that meet the conditions is prohibited.
