

Viewing the On Hold Queue

The On Hold queue displays jobs on the selected device which are on hold or waiting for a user's action before processing and/or printing. Jobs not submitted from the connected Prinergy server appear unavailable (in gray).

Jobs submitted from the connected Prinergy server can be [resubmitted](#), [moved to another connected device](#), or [removed](#) from the queue.

The **On Hold** queue contains the following information about each of the jobs in the queue:

Name

Displays the name of the job in the queue

Time

Displays the date and time the job was put on hold
