

Managing color libraries

1. From the Tools menu, select Color Editor.
2. In the Color Editor, in the Color Libraries section, perform any of the following actions:

To	Do This
Add a library	<ol style="list-style-type: none">a. Click Add.b. In the Add New Color Library dialog box, in the Library Name box, type a name for the new library.c. Either select an existing color space and click OK, or create a color space.
Import a library	<ol style="list-style-type: none">a. Click Import.b. In the Import Color Library dialog box, navigate to and select the color library (.dat) file.c. If you want to rename the color library file, change the file name but do not change the file extension, and then click OK. <p>Note: When importing a color library, ensure that the color space associated with the color library exists in the Prinergy system. If the color space name or colorants don't match, the import fails.</p>
Edit a library	See Managing color definitions .
Remove a library	Click a library, click Remove, and then click Yes to confirm. Important: Removing a user library deletes color definitions in both Global and Job tabs.
Export a library	<ol style="list-style-type: none">a. In the Color Libraries section, click a library, and then click Export.b. In the Export Color Library dialog box, navigate to and select the destination directory.c. If you want to rename the color library file, change the file name but do not change the file extension. Then click OK.
