

# Viewing color-accurate surfaces

**Requirements:** You cannot start the PressProof software unless Matchprint Virtual is installed on the same system. Ensure that all monitors are successfully calibrated.

1. Log on to PressProof.  
A list of Kodak Prinergy jobs or folders that contain TIFF surfaces appears.
2. Select the job that you want to view.  
PressProof retrieves the files from the server and displays them.
3. Select the surface that you want to view.
4. Use the PressProof tools to navigate around the surface or to switch to a different surface.  
For more information about using PressProof, see the *PressProof Help* and the *Kodak PressProof Keyboard Shortcuts Quick Reference Card*, available on Partner Place at <https://partnerplace.kodak.com/>.
