

Refine process template

At the top of the process template is the **Generate** list, which you use to select type of PDF to generate during the refine process. The choices are:

- **PDF**
- **PDF/X-1a:2001**
- **PDF/X-3:2002**

The refine process template contains several sections. Each section defines a subprocess of the refine process.

- [CEPS Conversion section of the Refine process template](#)
- [Fonts and Images section of the Refine process template](#)
- [Normalize section of the Refine process template](#)
- [PDF Preflight section of the Refine process template](#)
- [Copydot section of the Refine process template](#)
- [Spot Color Handling section of the Refine process template](#)
- [ColorConvert section of the Refine process template](#)
- [Trap section of the Refine process template](#)
- [Optimize section of the Refine process template](#)
- [Thumbnail section of the Refine process template](#)
