

Adding a color separation

1. Open the Color Separations dialog box:
 - a. Switch to the **Separations** or **Signatures** view.
 - b. Select a signature.
 - c. From the **Edit** menu, select **Color Separations**.
2. Click **Add Separation**.
3. In the Add Separations dialog box, type a name in the **Name** box and click **Add**.
The new separation is listed in the **Page Color** column.
4. If you want to map a color to this new color:
 - a. In the **Page Color** column, click the color you want to map.
 - b. In the **Output Selected as** list, select the new color you created.

For example, if you have three different PANTONE Blue separations listed in the **Page Color** box, and each one is spelled differently, you can create a new, correctly spelled color name, then map each incorrectly spelled spot color to the new color name.
5. Click **OK**.
