

Saving a script

1. In Proofer Viewer, click the **Maintenance** button.
2. Click the **Service**
3. In the **Service Tree**, navigate to **Scripts > Scripts**.
4. Either load an existing script (click **Load Script**) and edit it in the Top Script window, or write a new script in that window.
5. Click **Save Script**. If you modified an existing script, make sure to change the name so that you don't copy over the existing script.
