

Activity 6: Build an output process template

Who should complete this activity

- Prepress operators
- System administrators

Why you should complete this activity

A process template is required for every process executed in a Prinergy Evo workflow. This activity introduces you to building process templates in Prinergy Evo. It highlights the options available when building an output process template using the Process Template Editor.

Recommended reading

[Prinergy Evo Workflow Client user guide](#) for your version of Prinergy Evo Workflow software. Search for:

- Creating process templates
- What are my default process templates

Time required to complete this activity

15-20 minutes

What you'll learn

You will learn how to build an output process template using the Process Template Editor. You will access the output process template via the **File** menu to output supplied PDF files to Prinergy Virtual Proofing System software preview files.

What you'll need

In the location to which you extracted the activity files, find the **Activity 06** folder and this file:
wells.pl.pdf

What you'll do

You will create a new folder where an output process template can send processed files. You will then use the Process Template Editor to create a new output process template.
