

# Activity 11: Automate your workflow using hot folders and the template palette

## Who should complete this activity

- Prepress operators
- System administrators

## Why you should complete this activity

Automating your workflow with hot folders and the template palette can increase your efficiency in running jobs through Prinergy Evo. This activity shows you how to automate your Prinergy Evo workflow using both the template palette and hot folders. You will create a template palette to initiate the automated workflow you created in Activity 10.

## Recommended reading

[Prinergy Evo Workflow Client user guide](#) for your version of Prinergy Evo Workflow software. Search for:

- Creating and configuring template palettes

## Time required to complete this activity

20 minutes

## What you'll learn

You will learn how to configure a template palette linked to the automatic refine and proof workflow you created in Activity 10. This will enable you to submit files to this automatic workflow via a hot folder or a template palette.

## What you'll need

- Complete Activity 10.
- In the location to which you extracted the activity files, find the **Activity 11** folder and this file: `Type Brochure.ps`

## What you'll do

You will add the process template that you created in Activity 10 to a template palette. You will then automatically refine and proof an input file by submitting via the template palette. This process template will automatically refine and output the input file.
