

Activity 32: Use dynamic settings to reduce the number of process templates

Who should complete this activity

- Prepress operators
- Prepress managers
- System administrators

Why you should complete this activity

To avoid creating multiple nearly identical process templates, Prinergy Evo allows you to make last minute changes to frequently used settings before processing, such as screening settings. These changes are temporary and do not modify the underlying process template.

Recommended reading

[Prinergy Evo Workflow Client user guide](#) for your version of Prinergy Evo Workflow software. Search for:

Time required to complete this activity

15 minutes

What you'll learn

How making last-minute, temporary changes can reduce the total number of templates you need and increase your productivity.

What you'll need

In the location to which you extracted the activity files, find the **Activity 32** folder and these files:

- ITP_fat.p0001.pdf
- ITP-4up.pjtf

What you'll do

Make various types of temporary changes in an existing process template.

Observe the advantages of using dynamic settings and consider which settings you would use most frequently in your production environment.
