

Activity 34: Output a single PostScript flat

Who should complete this activity

- Prepress operators
- System administrators

Why you should complete this activity

Learn how to output a single PostScript flat and save time without refining to PDF first.

You will create an output from PostScript process template to create a virtual proof, and configure the output device, file delivery location, media, and layout placement. You will then input a press-ready PostScript file and output a PostScript flat to the Prinergy Virtual Proofing System software.
