Managing and using a stored SIF file

You can create several SIF files, and either rename them or store them in another folder. The only SIF file that DotShop uses is `DotShop.sif` in the `%ARAXIHOME%\CreoAraxi\bin` folder.

To use a stored SIF file, perform the following:

1. Rename the existing `DotShop.sif` file.
2. Perform one of the following actions:
   - Copy a stored SIF file to the `%ARAXIHOME%\CreoAraxi\bin` folder.
   - Rename the SIF file that you want to use to `DotShop.sif`.
