

# Marks

Marks are text or images that are printed, in addition to page content, on the press sheet and /or output media. A mark usually provides information about the output. For example, a mark can be an exposure bar or the job name. Marks are also often used for customer approval tags. Any mark can be used as a page mark or a sheet mark. However, a page mark should relate to page-specific information because it is placed on every page. A sheet mark should contain information relevant to the whole sheet or media because it is placed on the media once.

<b>Prinergy</b> <sup>™</sup>		PageMark Color-Cong
<input type="checkbox"/> OK to proceed	Job Name: <code>\$[jobname]</code>	
<input type="checkbox"/> Make corrections and proceed	PDF Page: <code>\$[pagenum]</code>

Signed: _____	Date: <code>\$[outputdate]</code>	
	Time: <code>\$[outputtime]</code>	
	Operator: _____	

You can add marks to your output in the following ways:

- Using an imposition marks file—add marks to the imposition using imposition software such as Preps, and then import the imposition and its marks file into Prinergy Workflow.
- Using the process template settings—specify the positioning and file path for a mark in the output process template.
