Correct monitor setup and maintenance

Make sure that all users who use the Matchprint Virtual software are informed about optimum techniques for setting up and maintaining the display monitor.

Note: User switching is not supported. If you switch users on the Mac computer, you must recalibrate the monitor.

Tip: Use a common user name and password on the Mac computer so that you do not have to switch users.

- Calibrate the monitor at the set expiry interval
- Leave the monitor turned on at all times
- Clean the monitor with approved cleaners
