About monitor proofing using Matchprint Virtual

With Matchprint Virtual technology, you can perform color-accurate monitor proofing on files in Smart Review.

You can review files in Smart Review for color accuracy if:

- Your printer has enabled your customer for color.
- Your printer has assigned a color profile to your files.
- You view the files using an approved Mac computer, Mac OS, and Safari browser, including a color monitor that meets the requirements specified in the *Matchprint Virtual Monitor Selection Guide*.
- You have calibrated your monitor using Matchprint Virtual, and the calibration has not expired.
- You have a job role that includes the View Color Management user right.
