Fixed bugs in Prinergy Workflow 9.0

This section lists bugs that are resolved in this release.

Referenced PR ID	Description	Legacy PR ID
PRINERGY-36657	Custom screen sets are not migrated during Prinergy rehost and not backed up	
PRINERGY-39620	RBA is not detecting some page approval changes	
PRINERGY-42382	System\ColorFlowDaemonHost registry value handling logic on failover server not implemented	
PRINERGY-42796	Prinergy Installer fails with error 'Setup failed to install VC12 Native Runtime Library Redistributable'	
PRINERGY-43303	PDF with form object crashes optimizer	
PRINERGY-44596	Output: Marks JTP crashes when using 'Show Press Sheet' option on certain imposition	
PRINERGY-45968	Passwords should be encrypted in communications with the server and clients.	
PRINERGY-46275	PSystemMonD.exe does not monitor the free space of the SysAux table space	
PRINERGY-46907	Prinergy installer needs to check for and manage the state of Cloud Agent during upgrades and downgrades	
PRINERGY-49613	TIFF-Direct - Cannot remove a CTP device from UADM after it was added, unless Digital Print license is present.	
PRINERGY-47685	Output: PDF with Font Glyph width inconsistencies causes BadFontDetection Pre-Processing Failed error	
PRINERGY-49633	Default sysaux tablespace is too small.	
PRINERGY-49726	Installer should increase the size of the non-interactive desktop heap	
PRINERGY-50004	Precheck should flag underscore characters in primary and failover server names	
PRINERGY-50231	Pattern that is tiling type 1 shifts when colormatcher is on	

PRINERGY-50247	After retrieving new license key, Proof and Norm JTPs added to pools, and Proof Pool changed from 512 to 256	
PRINERGY-50669	Ink Eater mark shows through some artwork content	
PRINERGY-50686	Font information remained in vector output PDF but no actual font text exists	
PRINERGY-50824	Evo Migration Tool: Migrated output process templates include /CPC_RIPToUse	
PRINERGY-50835	CLONE for 8.5 - Rehost Tool requires too much free disk space on the J drive	
PRINERGY-50880	PDF Vector: Blank space characters not converting to outlines for font HelveticaNeue-LT	
PRINERGY-50951	Preflight: Multipage PDF creates large A9R file and takes excessive time to process when reports enabled	
PRINERGY-51045	Pattern that is tiling type 3 shifts when colormatch is on	
PRINERGY-51046	Variable Text Marks replacement text is always set to Overprint.	
PRINERGY-51047	Pattern that is part of form object and tiling type 2 shifts when colormatched	
PRINERGY-51051	LPV: Text disappears after generate with Freetype library	
PRINERGY-51228	Vector Output JTP not cleaning up temporary input files	
PRINERGY-51462	Upgrade fails to run UpgradeScheme.exe with error: ORA-01017: invalid username/password; logon denied	
PRINERGY-51491	PDF Vector: Blank space characters not converting to outlines for font ShinGoPro-Medium	
PRINERGY-51492	PSystemMonD.exe does not monitor the free space in the Prinergy index table spaces	
PRINERGY-51563	PDF Vector or Publish: Blank space characters not converting to outlines for font HiraMinStdN-W1	
PRINERGY-51676	LPV: Text appears missing when change layer is an image and Blend Layers is applied	

PRINERGY-51793	Archiving from an Azure VM to an on-premise disk is slow	
PRINERGY-52018	Upgrade overwrites RBA Process Template Overrides enabled by customers	
PRINERGY-52091	LPV: Oldenburg glyph disappears after Generate with Freetype library	
PRINERGY-52153	Rehost tool does not restore the RBA extension dlls in the Rules\Extensions folder	
PRINERGY-52226	When 5 instances of Workshop are run on a VDI server Dashboard Listener warnings will be displayed
