Creating process templates based on an existing process template

1. In the **Process Templates** pane, locate a process template, and double-click it.
2. In the process template, modify the parameters as desired.
3. Click **Save As**.
4. Select an existing process template group in which the new process template will be located, or create and select a new process template group.

To	Do this
Create a new group	Type a name for the new group, and click **Create Process Template Group**.
Open an existing group	Double-click the group in the list. **Tip:** You can also select the group and select **Open**.

5. Type a name for the new process template and click **Create Process Template**.
