

Setting Integrated Preps preferences

Edit the `PrepsPrinergy.cfg.template` file on the Prinergy server in order to set preferences for Preps on all clients.

Tip: You can determine what attributes the lines in the file control by experimenting on the `PrepsPrinergy.cfg` that is on the client. Once you determine exactly how to make the desired changes, modify the `PrepsPrinergy.cfg.template` on the server to affect Preps on all clients.

1. On the Prinergy server, navigate to the file

`AraxiPreps\Profiles\PrepsPrinergy\PrepsPrinergy.cfg.template.`

Tip: Before you modify the file, you may want to make a copy of the original, naming it `PrepsPrinergy.cfg.template.original.`

Location of the client `PrepsPrinergy.cfg`:

- Macintosh: `Applications\Kodak\Prinergy\AraxiPreps\Profiles\PrepsPrinergy`
- Windows: `Program Files\Kodak\Prinergy\AraxiPreps\Profiles\PrepsPrinergy`

2. Edit the file as appropriate:

If you want to	Then
Set the default unit of measurement to millimetres	Search for the string -UNITS: and replace the number after the colon (:) with 3 . For example: -UNITS:3
Set the default job to be PDF > PDF	Search for the string -DEFAULT_JOB_KIND: and replace the number after the colon (:) with 2 . For example: -DEFAULT_JOB_KIND:2
Set the punch mark on by default	Search for the string -PUNCHMARK: and replace the number after the colon (:) with YES . For example: -PUNCHMARK:YES
