## Working with project or library groups

You can group projects and libraries for a specific customer. Project and library groups add an extra organizational level to your files, between the customer level and the project and library levels.

You might create a group for one of your clients, and then place all of the projects for that client inside the group.

**Important:** When you delete a project group or library group, all projects or libraries in that group are deleted.

1. Perform the following actions:

To perform this action	Do this
Enable project and library groups	<ul> <li>a. Select a customer.</li> <li>b. In the lower pane, click the customer name.</li> <li>c. In the Edit Customer Information dialog box that appears, select the Enable project/library groups for customer check box.</li> <li>d. Click Update.</li> </ul>
Create a project group or a library group	<ul> <li>a. Select the customer, and select Group &gt; Create Group.</li> <li>b. Type the group name, and click Create.</li> </ul>
Move a project into a group	<ul> <li>a. Under <b>Project</b>, select a project.</li> <li>b. From the <b>Project</b> menu, select <b>Move Project</b>.</li> <li>c. In the Move Project dialog box that appears, locate the group, and click <b>Move</b>.</li> </ul>
