Searching for projects and libraries

You can search for projects and libraries by name and attribute, and perform actions from the search results.

- 1. Select the customer.
- 2. Perform one of the following actions:
 - For project search, select **Project** > **Search Projects**.

Note: You can filter the list by selecting the project state.

• For library search, select **Library** > **Search Libraries**.

A list of all the projects and libraries of the customer appears.

3. To view more details about a project or a library, select the row of the specific project of library.
