

# X-Rite i1 spectrophotometer support

**Note:** Support for the original i1Pro and i1iO has been discontinued by X-Rite. These first-generation devices are no longer supported by Kodak Proofing Software. They may continue to work, but replacement with a newer model is recommended.

## Supported offline spectrophotometer

- Before using a connected X-Rite i1Pro or i1iO spectrophotometer to obtain color measurements, check the latest Kodak user documentation for guidelines and procedures, to be used in conjunction with the X-Rite documentation.
- If your problem is not described and appears to be a Kodak software issue, contact a technical service representative.
- For i1Pro or i1iO hardware-related advice and warranty issues, contact an X-Rite service representative or go to the X-Rite Web site at <http://www.xrite.com>.
