Processing setup for Certified Process for Color Confirmation jobs

Jobs for the Certified Process for Color Confirmation can be processed via Open Connectivity hot folders or the workflow software.

> Perform the applicable tasks for your workflow:
>
> | Workflow | Tasks |
> |---|---|
> | Prinergy software without ColorFlow

 or

 Kodak Proofing Software Open Connectivity | Set up the process template or hot folder settings to use the layout and profile for the color bar and the media configuration for the media and proofer. |
> | **ColorFlow-enabled Prinergy software** | Set up the process templates to use the layout for the color bar, the media configuration for the media and proofer, and the ColorFlow color setup for the proof standard. The color setup defines the profiles to use for processing. |
>
> For details, see the applicable connectivity documentation.
