

ColorFlow 9.0.2 Release Notes

New Features

Support for X-Rite i1iO3 spectrophotometer

- Full table support with X-Rite i1iPro3 head

Problems Fixed

Issue Number	Description
CLRFLW-9100	Predicted Response Report creation crashes ColorFlow with a certain measurement file.

Limitations

- **mac M1:** i1iO and i1iSis spectrophotometers not supported with M1 in 9.0.2, as device drivers require updating. M1 support for spectrophotometers to be officially qualified in version 9.5.0.
- **macOS 12.x Monterey:** ColorFlow client may work without any issues, but hasn't been fully tested and qualified in 9.0.2. Monterey will be officially qualified in version 9.5.1.
