ColorFlow client software for Macintosh computers

- Macintosh computer with an Intel processor running macOS Mojave (10.14) - Oct 1, 2023 No longer supported, Catalina (10.15) - Oct 1, 2023 No longer supported or Big Sur (11.x)
- To install ColorFlow software, you must have a user account with administrator privileges.
- Adobe Reader or Apple Preview software (to display reports)
- Intel Core 2 Duo processor (2.0 GHz minimum)
- 1 GB RAM (minimum); 2 GB RAM (recommended)

ColorFlow client in a KMS environment

Kodak does not support running the ColorFlow Client on a on-premise workstation in a KMS environment, because of latency issues when communicating between the local ColorFlow client and the ColorFlow database in the cloud. The ColorFlow client MUST be run on the KMS Azure Primary server or Azure Virtual Desktop. ColorFlow Measure Edition running on a on-premise workstation is required to capture chart measurements for import to the ColorFlow client.

Please see ColorFlow Measure Edition
