

Plate curves

Plate curves control the tonal response of the plate output. Plate curves use a single channel to calibrate plates for all separations. You can manage your plate curves in the **Plate Curves** tab.

- [Creating a plate calibration curve](#)
- [Editing tints in a plate curve](#)
- [Viewing tint values and response of a plate curve](#)
- [Exporting plate or print curves](#)
- [Deleting plate or print curves](#)
- [Importing a Harmony plate calibration curve](#)
- [Updating a Harmony plate curve](#)
- [Managing obsolete Harmony Curves](#)
