

Activity 9: Step and Repeat—Wrapped Job

Who should complete this activity

This activity should be completed by Pandora users who output to a continuous print process like gravure or flexographic cylinder.

Why you should complete this activity

This activity demonstrates how to create a wrapped step-and-repeat layout. A step-and-repeat operation is used when positioning artwork without a die.

In the following activity you import artwork to a new job and create a wrapped step-and-repeat layout on a substrate. Using the step-and-repeat features in Pandora, you give the step-and-repeat layout a unique name, define the horizontal and vertical offset distance and the number of times the artwork is to be repeated.

Recommended reading

- Step-and-repeat section in the [Pandora User Guide](#) for your version of Pandora software

Time required to complete this activity

30 minutes

What you'll need

For this activity [locate](#) this file: Pandora Activity Files\Soap Label\AloeSoapLabel.pdf.

What you'll learn

- [Objective 1—Create a new job](#)
- [Objective 2—Add job resources from the ShopMap palette](#)
- [Objective 3—Import artwork and position it on the substrate](#)
- [Objective 4—Step and Repeat the artwork](#)
- [Objective 5—Add and duplicate a mark](#)
- [Objective 6—Save the job, and then output it as a PDF file](#)
- [Review what you've learned](#)

Note: If you do not quit Pandora after creating a Step and Repeat and remain in the same working session, Pandora remembers the last used stepped distance. This is currently a known limitation: Pandora-920.
