# Activity 11: Resizing Artwork in Pandora

## Who should complete this activity

This activity should be completed by anyone who plans to use Pandora regularly.

## Why you should complete this activity

This activity demonstrates how to resize and position artwork in Pandora. This allows operators to resize and work with PDF files that may not be the correct final size. For example, a designer may include a studio logo or printing information that isn't needed in the final layout. In previous versions of Pandora, the operator had to set the size of the artwork in software such as Adobe Acrobat software.
