

Assigning a job to a digital device (in the No Target Press queue)

In the **No Target Press** queue, you can assign a job to a digital device if it is in the **No Target Press** status; that is, not assigned to a digital device yet.

1. In the **No Target Press** queue, select the job that you want to assign to a digital device and click  (located in the top-right corner above the list of jobs in the queue), or right-click the job.
2. From the menu that appears, select **Reassign** and then select the desired device from the list of devices that appears.
3. Depending on the device you selected in step 2, perform one of the following actions:
 - If you selected a device from the list above the line separator, the Digital Job Ticket Editor opens, displaying the relevant parameters for the selected digital device. In the Digital Job Ticket Editor dialog box, change any settings or keep the settings as is, and click **Send**.
 - If you selected a device from the list below the line separator, the Send to dialog box opens. If you want to change the number of copies, in **Copies** box, change the value, and click **Send**.

The **Press** column in the **No Target Press** list displays the assigned digital device, but the job is not submitted and stays in the **No Target Press** queue. To submit the job, right-click it and select **Submit**.
