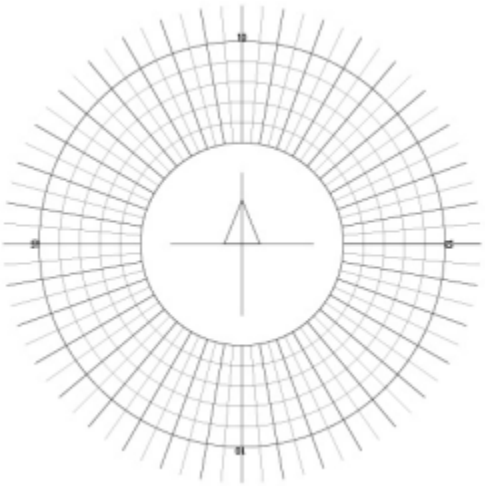
Standard Grid

Standard Grid is used to create a circular standard grid.

1. Launch Adobe Illustrator.
2. In the Illustrator menu bar, go to the Window menu, select **Prinergy > Warp > Circular Standard Grid**. The Standard Grid dialog box appears, displaying the following parameters:

	Set the X-position for center of circle.
	Set the Y-position for center of circle.
	Set the distance between inner arc and center of circle.
	Set the distance between outer are and center of circle.


3. To confirm the settings and create the standard grid, click **OK**.
