

Previewing pages

Preview a job's pages in the **Pages** and **Press Runs** workspace panes.

1. In the **View** menu, select the features that you want to preview.
2. Select a page to preview its content and trim box alignment:
 - To preview an input file page before adding to a run list, use your Adobe Acrobat software to open the file from its folder location.
 - To preview a run-list page in the **Pages** view, select a page in the **Pages List**.
 - To preview a content page in the **Press Runs** view, select the press run, sheet, web, or side that contains the section in the **Press Runs List**.
