

# Press run properties

In the **Press Runs List**, select a press run to display its settings in the **Properties** pane.

<b>Page Count</b>	The number of template pages on this press-run layout
<b>Fold Pattern</b>	Select from the filtered list of fold patterns that match the section page count, or click <b>Browse for fold pattern</b> to display the Fold Pattern dialog box.
<b>Template Name</b>	If a template was used to build this press run, displays the template name. Otherwise, a default <b>Untitled</b> name is assigned, with a number that increments for each existing Untitled template in the <b>Templates</b> list. If you save the current job as a template, the new name is displayed.
<b>Signature Name</b>	If a template was used to build this press run, displays the template signature name. Otherwise, an editable default name is assigned, starting at <b>Untitled Sig 1</b> and incrementing for each unique layout.
<b>Auto Select Signature</b>	If you select this check box (default), the <b>Auto Select</b> option is added to the context menu for this template signature in the <b>Layouts</b> resource pane.
<b>Section Count</b>	The number of times that you added a product section to this press-run layout. You can add one or more product sections to a single press run, including the same product section multiple times or multiple different sections, typically for the same product.
<b>Binding Style</b>	Determines the sequence in which content pages flow through the template pages on the press-run layouts: <ul style="list-style-type: none"><li>• <b>Flat Work</b> (no binding)</li><li>• <b>Perfect Bound</b></li><li>• <b>Saddle Stitched</b></li><li>• <b>Come and Go</b></li><li>• <b>Cut and Stack</b></li><li>• <b>Mixed</b> (more than one binding style)</li></ul>
<b>Work Style</b>	View or select the work style that describes how the press prints the press sheet: <ul style="list-style-type: none"><li>• Sheetwise</li><li>• Work and Turn</li><li>• Work and Tumble</li><li>• Perfector</li><li>• Single-sided</li></ul>
<b>Stock</b>	The name of the stock resource that you assigned to this press run
<b>Media</b>	The name of the media resource that you assigned to this press run

<b>Width, Height</b>	The dimensions of the stock for this press run
<b>Punch Distance</b>	<p>If the media has a punch, specify the distance from the press sheet edge to the punch center.</p> <p>The punch is the hole on which the media can be anchored on pins for accurate alignment (also referred to as setback).</p>
