

Viewing a rule set

You can view a rule set—including information about it—in Job Manager or Rule Set Manager.

1. In the **Process Templates** pane of Job Manager or in Rule Set Manager, double-click the rule set.
The rule set appears in Rule Builder. If you do not have RBA user rights, the rule set has read-only protection.
2. Right-click the rule set and select **Get Info**.
3. (Optional) If you have the user rights to work with RBA, update the **Description** box and click **OK**.
