

Stopping a rule set

Stop a selected rule set while it is executing. This does not stop the processing of all rule sets.

- Stop a rule set in any of the following ways:
 - In the **Process Template** pane, right-click a rule set and select **Stop All Processing**.
The rule set stops executing, and it is disabled.
 - Open Rule Set Manager. In the **Enabled Rule Sets** list, right-click a rule set, and select **Stop All Processing**.
The rule set stops executing, and it is disabled.
 - View the Executing Rules page, and click **Stop**  next to the rule set.
The rule set stops executing, but it is still enabled.
