

Edit menu in Rule Builder

Use the menu items in the **Edit** menu to add, insert, edit, and delete rules.

Undo

Reverses the last action that you performed in the Rule Builder workspace

Redo

Reapplies the last action that you did in the Rule Builder workspace

Cut

Removes the selected rules from its current location if you select **Paste** in another location

Copy

Duplicates the selected rules if you select **Paste** in another location

Paste

Adds one or more rule sets that were previously cut or copied. You can paste into several locations:

- The same Rule Builder window
- Another rule set in another Rule Builder window
- Other software that accepts images, such as Adobe Photoshop or Microsoft Word

Tip: To change the size of the image that is pasted into other software, change the scale of Rule Builder before you cut or copy.

Select All

Selects all rules

Add Rule

Adds a placeholder event and action

Insert Rule

Inserts a placeholder for an action before the selected action in the Rule Builder workspace

Delete

Removes the selected rules

Edit Rule

Opens the Rule Parameters Editor tool, so that you can modify the action's parameters for a rule
