

View menu in Rule Builder

Use the menu items in the **View** menu to change the way you view the events and actions in a rule set.

Show Exceptions

Makes the resulting **Exception** event visible for the selected action.

Arrange Now

Arranges the event and action icons in an optimal manner (snaps to grid) within the working area in Rule Builder.

Auto Arrange

Controls whether the event and action icons are automatically arranged on the working area in Rule Builder.

Zoom & Pan

Opens the entire rule set graphic in a floating window.

Use the slider bar to adjust the zoom (size of contents) within the working area. You can also drag the green square to pan to a different part of the rule set in the working area.

Show Description

Displays the notes recorded about the rule set in a pane below the working area. If the rule set is not enabled or read-only, you can modify the description.

Show Tooltips

Displays a brief description of an event or action when you place the cursor on the event or action icon in the **Events**, **Flow**, and **Actions** tabs.
