

Finding events and actions in Rule Builder

You can quickly find an event or action in Rule Builder by typing the first letters of the name.

1. Open Rule Set Manager, and click **New Rule Set**.
2. In Rule Builder, click the **Events**, **Flow**, or **Actions** tab.
3. Click any white space in the left pane.
4. Begin to type the letters of the event or action that you are looking for. For example, type
`input files add.`

Rule Builder scrolls to the first occurrence of that string of letters.
