# Importing a rule set

You can import rule sets from another location to obtain the rule sets from another Prinergy site.

1. In Rule Set Manager, in the **Rule Set Library** list, right-click the group that you want to import the rule set into, and select **Import**.
You can have rule sets with the same name on your system, as long as they are in different groups.
2. In the Import dialog box, browse to and select the `.xml` file or `.zip` file containing the rule set or group of rule sets that you want to import.
3. Click **Import**.
The imported rule set appears in the Rule Set Library.
